

Conservation Guidelines for Auto / Equipment Care

- ◆ For personal vehicles, use a commercial car wash that treats or recycles its wastewater, or wash your car on the lawn so water will infiltrate into the ground.
- ◆ For commercial vehicles, use a commercial car wash that treats or recycles its wastewater, or inside at your place of business where waste water is treated.
- ◆ Charity car washes should follow commercial vehicle washing guidelines. Refer to the “Car Washing in Belpre” and “Car Washing in Marietta” buttons for more information about Charity Car Washes in these cities.
- ◆ Repair leaks. Clean spills with an absorbent, such as kitty litter, and dispose to solid waste. Never hose down a spill.
- ◆ Dispose of used auto fluids & batteries at designated drop-off recycling locations. Refer to the “Recycle / Disposal” button for more information.
