

# WASHINGTON SOIL & WATER CONSERVATION DISTRICT

2019-2020

## Educational Programs

As one component of our outreach efforts, we will be visiting schools located within Washington County throughout the academic year. It is our goal to offer curriculum enhancing activities that promote environmental, agricultural, and conservation education while drawing connections with other subject matters. A visit to your classroom is FREE of charge and is guaranteed to be both educational and engaging. All of our programs are correlated to the Ohio Academic Content Standards and many of the activities are sourced from notable programs such as Project WET, Project Learning Tree, and similar accredited programs.

*“Earth and sky, woods and fields, lakes and rivers, the mountain and the sea, are excellent schoolmasters, and teach some of us more than we can ever learn from books.*

*- John Lubbock*

## Popular Topics

- Adaptations
- Agriculture Connections
- Composting
