

# WASHINGTON SOIL & WATER CONSERVATION DISTRICT

## Educational Programs

We offer a variety of programs designed to promote environmental, agricultural and conservation education topics to Schools and Programs within Washington County. Visits are free of charge and designed to correlate with Ohio's Learning Standards and Model Curriculum.

### Educational Program Topics

- Soil Science
- Habitats/Ecosystems
- Water Cycle
- Adaptations
- Food Webs
- Plant Cycle

These are just a few of the program topics we offer. Topics can be formatted to fit any grade level, number of students and time allotment.

Educational Visits are not limited to only during school hours. Have an upcoming STEAM event, Literacy Night or Careers Talk? Ask how we can help!

For additional information or to schedule a program please contact Alexis Coffman
