June 2026

Dear Friends of Conservation,

The Washington Soil and Water Conservation District will be creating a 2027 Conservation Calendar. The Calendar will feature photos submitted from the community highlighting the beauty of Washington County. Also included will be informational facts, conversion tables, charts and other useful information for the County.

The District will be selling ad space in the Calendar. There will be 2 options. Option 1 is a 5"x1" space at the bottom of the one month's page. This option will share the ad space with another business's 5"x1" advertisement. Option 2 is 10"x1" space at the bottom of the one month's page. This option will be the only ad listed on the month's page. Attached is examples of both options. See included example month and advertising form for prices. If there is a specific month the business would like their ad listed, please indicate that on the form.

The Calendars will be given away at our annual meeting in October. Extra Calendars will be at the District's office available for anyone to pick up. Each business who sponsors an ad will receive a Calendar.

Space is limited and available on a first come first serve system. If interested in sponsoring an ad space, please contact the District to receive a form. Contact can be made by calling, emailing or stopping by during our normal business hours.

The District would like to thank the community for their continued support. Whether you participate in the programs, take advantage of the technical services or simply read the newsletter, we appreciate you supporting our conservation efforts.

Sincerely,

Alexis Coffman
